

In NUBRI we have many ongoing projects including:

Whole Genome Sequencing of Methicillin resistance <i>Staphylococcus aureus</i> isolated from Khartoum
Whole genome Hepatitis Delta Virus (HDV) among Hepatocellular Carcinoma and Liver Cirrhosis Patients in Khartoum State- Sudan
Whole-Genome Sequencing of Gram Negative Bacterial isolated from Sudan
Development of Linux system for Bioinformatics Analysis
Epidemiological Genetic Mapping of Methicillin-Resistant <i>Staphylococcus aureus</i> in Sudan-Hospitals Using Next Generation Sequencing
Whole-Genome Sequencing for Detecting Antimicrobial Resistance in Gram Negative Bacterial isolated from Sudan
