## **WORK EXPERIENCE:**

I completed the pre-fellowship training in General Surgery in Khartoum and Riyadh Central Hospital, The two largest teaching hospitals in Sudan and Saudi Arabia with Over 1,000 bed each.

I continued to gain experience in clinical and operative surgery in the Military Hospital (RKH) in Riyadh, a centre of excellence of high reputation in Saudi Arabia And the Middle East.

After moving to the UK in February, 1994, I gained wide experience in General Surgery and become confident in bowel and laparoscopic surgery, particularly laparoscopic cholecystectomy and Laparoscopic hernia repair. My experience consolidated further in upper and lower GIT endoscopy.

In February, 1995, I joined the Northern Deanery Higher Surgical Training Programme where I continued to gain more confidence and operative experience in General Surgery and to extend this to include Vascular Surgery in both elective and emergency cases as well as Endocrine Surgery (thyroid & parathyroid surgery)

Then I moved to Transplantation where I gained a wide exposure in liver transplantation, Hepato-biliary & Pancreatic Surgery, and a consolidated experience in Adult and Paediatric Renal Transplantation both cadaveric, living related/unrelated and transplants from non-heart beating donors, as well as access surgery for haemo-&-peritoneal dialysis and multi-organ retrieval including laparoscopic donor nephrectomy. I managed to combine this experience in renal transplantation with more experience in vascular & endocrine surgery by moving to the Northern Vascular Centre at the Freeman Hospital where I received an intense training in vascular surgery to include aortic and bypass surgery in both elective and emergency cases. Also I had the chance to gain a considerable experience in endocrine surgery (thyroid & parathyroid surgery) and laparoscopic surgery

Finally at the end of my training I passed the Intercollegiate Specialty Examination in General Surgery. (Subspecialty-General Surgery and Transplant), to obtain the FRCS (Gen-Surg), and the certificate of completion of specialist surgical training (CCST).

Currently I am working as a consultant General and Renal transplant Surgeon. In addition to the common surgical operations, I do a regular list in laparoscopic surgery, particularly laparoscopic cholecystectomy, hernia repair, In addition to participation at different stages of laparoscopic donor nephrectomy as part of our live donor programme, and endocrine surgery mainly thyroid and parathyroid. I have a large interest in Access Surgery and I am taking a lead part in provision of haemo-&-peritoneal access procedures in renal failure patients as well as all forms of renal transplantation both in adult and paediatric group.

I am a **clinical teacher and examiner, Honorary Lecturer** at the Nottingham University during my work in the UK and **examiner** for the Intercollegiate **MRCs** examinations at the Royal College of Surgeons of Edinburgh, UK centers and overseas (Khartoum Center)

## **TEACHING EXPERIENCE AND ACTIVITIES:**

I have a keen interest in and commitment to teaching in general and surgery in particular. During my basic surgical training, I was involved in teaching of medical students. This was in both bedside and tutorial-based teaching of pre-clinical, 4<sup>th</sup> and 5<sup>th</sup> year medical students, as well as my junior and senior house officer colleagues.

During my work in Sudan and Saudi Arabia, as well as after moving to the UK, I actively participated in teaching:-

- Third and Final year medical students
- Surgical senior house officers and house officers

In addition to organization and regular participation in the departmental teaching activities involving;-

- weekly case presentations, Journals review and Tutorials
- Monthly case notes audit and mortality - morbidity review
- Monthly Radiology and Pathology meetings
- Surgical meetings and lectures in the region

After joining The Nottingham University Hospital and as a clinical teacher and **examiner, Honorary Lecturer**, Nottingham University, I continued teaching third and final year medical students in Tutorial groups and bedside teaching. **I was the college surgical tutor during my work at the Nottingham University Hospitals and continued member of the examiners panel for the Intercollegiate MRCS examinations at the Royal College of surgeons of Edinburgh.**

- **Currently Associate Professor of Surgery – The University of Medical Sciences and Technology**
- **Member of the Examiners Panel – the Royal College of Surgeons of Edinburgh**

## **RESEARCH EXPERIENCE:**

### **Research Project:**

#### **EFFICACY OF BALLOON ANGIOPLASTY OF THE SUPERFICIAL FEMORAL ARTERY IN MANAGEMENT OF LOWE LIMB ISCHAEMIA.**

<b><u>Supervisors:</u></b>	<b>Professor A Nicoladies</b>	<b>Mr MG Wyatt</b>
Centre,	Irvine Vascular Laboratory,	Northern Vascular
Tyne.	Imperial College of Medicine, St. Mary's Hospital,	Freeman Hospital, Newcastle-upon-
	London.	

I spent a period of two years of research into the clinical outcome and patient satisfaction following balloon angioplasty of the superficial femoral artery in patients with lower limb ischaemia.

Results from this project have led to presentations at national meetings and thesis submission resulted in the award of **MSc degree**, University of London, and Diploma of the Imperial College in Vascular Technology and Medicine.

## **AUDIT EXPERIENCE:**

I gained experience in auditing surgical practice by being the principal investigator of the efficacy of the superficial femoral artery at the Freeman Hospital, Newcastle-upon-Tyne.

## **ADMINISTRATION:**

- During the clinical years of my training, I used to organize the various academic teaching meetings, frequent seminars and journal clubs for the basic and higher surgical trainees.
- I was also responsible for organizing the monthly on-call rota for the unit. I had the opportunity to plan and organize various weekly activities within the surgical units.
- I was the **lead surgeon** for Access surgery, both vascular and peritoneal, Nottingham University hospital
- Appointed as a **director** of Transplantation as of the 1<sup>st</sup> January 2008-to-September 2009 – The Nottingham University Hospital, UK (by rotation)
- Establishing two private transplant centers in Khartoum - Sudan

**I am a clinical lead in Renal Failure surgery (Access) in our unit.**

- **Chief of Medical Staff – Al-Zaytouna Specialist Hospital – October 2009-February 2012, Khartoum-Sudan**
- **Acting chair of Surgery Division – Royal care International Hospital –March 2012-September 2013**
- **Head of Surgery and O.R Committee – HMG Takhasussi Hospital – July 2013-to August 2015**

**LEISURE ACTIVITIES AND HOBBIES:**

Hobbies include Tennis and Soccer.
